

# 磐梯山ジオパークを体感しよう!

Let's Experience Bandaisan Geopark

## 1 ジオパークって、なに?

身の回りの山や川などの地形とそれを形作っている岩石や地層を通して、地球の活動や大地の成り立ちを知ることができる“大地の公園”です。また大地の上で育まれた生態系や人々の歴史・文化さらに地元の特産物や郷土料理、そして温泉、大地と大地の上のすべてのものの関係について楽しみながら体感できること、それがジオパークです。

磐梯山を中心とする猪苗代町・磐梯町・北塩原村の3町村からなる磐梯山地域は、2011(平成23)年9月5日に、日本ジオパークに認定されました。この日は奇しくも、1950(昭和25)年に磐梯朝日国立公園が誕生した日と同じです。

### 1.What is a Geopark?

A Geopark is a large area of land where visitors can learn about the geological activity of the earth and the history of the land by exploring the topography of the mountains, rivers, and other geological features in the area, as well as the boulders and strata that define them. Visitors can also learn about the ecological systems that have developed on the land and the history and culture of the people who live there, including their local foods and specialty products, and local hot springs. This type of park, where one can enjoy bodily sensation about

the land and the connections between it and everything on it, is called a Geopark. The Mt. Bandai region, centered on Mt. Bandai (Bandaisan) and including the towns of Inawashiro and Bandai and the village of Kitashiobara, was certified as a Japan Geopark on September 5, 2011 (Heisei 23). Coincidentally, this certification occurred on the same day that Bandai-Asahi National Park was established in 1950 (Showa 25).

## 2 二つの顔をもつ、磐梯山!

### 磐梯山ジオパークのメインテーマ

『磐梯火山の誕生と変遷、特に山体崩壊と岩なだれがもたらした大規模な地形および自然環境の変化について体感することができるジオパーク』

### 2.The Two Faces of Mt. Bandai

The Main Theme of Bandaisan Geopark. A Geopark where visitors can get a sense of the large scale changes to the topography and natural environment in this area, brought about by the birth and changes over time of the volcano Mt. Bandai, especially sector collapses in the mountain and debris avalanches.

### 1 会津富士と呼ばれる優美な顔

#### 1.The serene face known as "Aizu Fuji"

磐梯山を南方から見ると、手前に猪苗代湖があり優美な姿は“会津富士”と呼ばれる。Looking at Mt. Bandai from the south, Lake Inawashiro lies in front of you. Behind the lake is the impressive figure of Mt. Bandai, sometimes called “the Mt. Fuji of Aizu.”

およそ4万年前に起こった“翁島岩なだれ”、猪苗代湖の誕生との関係は?! What is the relationship between the birth of Lake Inawashiro and the Okinajima Debris Avalanche that occurred approximately 40,000 years ago?!

崩壊した山体の体積は、東京ドームおよそ3000杯分!磐梯山の南西麓に流れ山を形成させた。この時に川がせき止められ猪苗代湖が誕生か? The volume of debris from the Okinajima Debris Avalanche is enough to fill up Tokyo Dome 3000 times! The debris avalanche caused by the collapse of the peak of Kobandai ("little Bandai") resulted in the death of 477 people and in an instant completely changed the north side of Mt. Bandai.

JR磐梯町駅付近に見られる翁島岩なだれによる流れ山の内部。猪苗代湖の翁島は、この噴火で生じた岩なだれが流れ下って形成された流れ山のひとつ。

The interior of a flow mound created by the Okinajima Debris Avalanche, near JR Bandai Machi Station. The island of Okinajima on Lake Inawashiro is one of the flow mounds that was formed in the debris avalanche, a debris avalanche which was itself caused by an eruption.

### 2 磐梯式噴火を荒々しく見せる顔

#### 2.The wild face exposed by the "Bandai-type Eruption"

磐梯山を北方から見ると、手前に松原湖があり、後方に荒々しい岩肌を露出させた爆裂火口(崩壊壁)がある。Looking at Mt. Bandai from the north, Lake Hibara lies in front of you. Behind Lake Hibara, where the rough rock face of the mountain has been exposed (the collapsed wall), is an explosion crater.

1888(明治21)年に起こった“岩なだれ”、裏磐梯高原の誕生との関係は?! What is the relationship between the birth of the Urabandai Kougen and the Debris Avalanche that occurred in 1888 (Meiji 21)?!

小磐梯の崩壊による岩なだれは、477名もの犠牲を出し磐梯山の北側を一変させた。しかし、人と自然の合わせ持つ力が裏磐梯高原を再生した。The debris avalanche caused by the collapse of the peak of Kobandai ("little Bandai") resulted in the death of 477 people and in an instant completely changed the north side of Mt. Bandai.

西洋から導入された自然科学の新しい時代が始まろうとする時に起こった1888年の磐梯山噴火。先駆けて研究が行われ“磐梯式噴火”として世界で注目された。

The 1888 eruption of Mt. Bandai occurred at the dawn of a new era in which the study of the natural sciences was being introduced into Japan from the West. State-of-the-art research was done on Mt. Bandai and the "Bandai-type eruption" received attention all over the world.

## 3 このマークには、4つのワケがある!

磐梯山ジオパークロゴマークコンセプト - 磐梯山を見上げて -

- ① 磐梯山の「B」の文字がモチーフ力強い筆のラインで磐梯山の圧倒的な存在感を表現
- ② 山に登る白い四角は神事に扱われる紙垂であり磐梯山に登り崇拝する人々を象徴
- ③ 3つの輪は猪苗代町、磐梯町、北塩原村を表現し、猪苗代湖に生まれる波紋で神聖な雰囲気演出
- ④ 太陽は、雄大な磐梯山の豊かな自然の象徴であり人々の思いが一つになって熱く燃えている様子

### 3.The four reasons we have chosen this logo

Concept for the Bandaisan Geopark Logo Looking up at Mt. Bandai

- ① The motif for the logo is the "B" from Bandaisan. The vigorous pen stroke of the "B" expresses the powerful presence of Mt. Bandai.
- ② The white squares climbing up the mountain are sacred white-paper-strips called shide that are used for Shinto Rituals. They symbolize the people who shide climb Mt. Bandai to worship the gods of the mountain.
- ③ The three rings are ripples from Lake Inawashiro. They represent the three municipalities of Inawashiro, Bandai, and Kitashiobara, and convey the sacred atmosphere of the area.
- ④ The sun symbolizes the rich, natural beauty and grandeur of Mt. Bandai, and the people's warm hospitality radiating from the Geopark.

## 4 会津磐梯山は、宝の山よ! ジオパークで、人と大地の物語を旅しよう!

### 4.Aizu Bandaisan, is a mountain of treasures

("Aizu Bandaisan wa, takara no yama yo.")

At Geopark let's travel though the story of the people and the land!
